[illegible]

Il presente documento è un estratto dalla relazione di lavoro svolta dal sottoscritto in qualità di collaboratore scientifico del Dipartimento di Fisica dell'Università di Roma Tor Vergata, durante l'anno accademico 2019/2020. L'obiettivo principale della ricerca è stato quello di studiare le proprietà fisiche dei materiali nanostrutturati, in particolare dei nanofili di silicio, al fine di comprenderne meglio le loro caratteristiche e le loro applicazioni in campo elettronico e optoelettronico.

Il lavoro è stato svolto in stretta collaborazione con il Prof. Dr. [Nome], che ha fornito le indicazioni metodologiche e scientifiche necessarie per lo svolgimento della ricerca. Le attività principali svolte durante l'anno sono state:

- Realizzazione e caratterizzazione dei nanofili di silicio.
- Studio delle proprietà fisiche dei nanofili, in particolare della loro conduttività e della loro risposta ottica.
- Analisi dei dati sperimentali e confronto con i risultati teorici.
- Partecipazione a seminari e convegni scientifici.

Grazie alle attività svolte, è stato possibile ottenere risultati significativi che contribuiranno a migliorare la nostra conoscenza delle proprietà fisiche dei materiali nanostrutturati. In particolare, è stato osservato che i nanofili di silicio presentano caratteristiche uniche che li rendono candidati ideali per applicazioni in campo elettronico e optoelettronico.

Il presente documento è riservato ai soli fini di studio e ricerca e non deve essere distribuito o utilizzato in alcun modo senza il permesso scritto del Dipartimento di Fisica dell'Università di Roma Tor Vergata.
